## **Walsh Door & Security Expands to Better Serve Commercial Customers Nationwide.**

**Des Moines, IA — April 15, 2024** — Walsh Door & Security is excited to announce our purchase and renovation of 2300 Delaware Avenue in Des Moines, IA. The 80,000 sq. ft. newly enhanced building is located one block south of Walsh's current location and at the corner of Guthrie and Delaware, just a few miles from the intersection of I-80 and I-35. The newly acquired facility was the former Hiland Potato Chip factory, and more recently the Des Moines Bolt / Wurth USA location. The 80,000 sq. ft. facility opens on April 17, 2024.

The company headquarters and office staff located at 2600 Delaware Avenue in Des Moines, along with the three warehouses north of it, will remain. The addition of 2300 Delaware brings Walsh's presence in Des Moines to nearly 200,000 sq. ft. The 2300 Delaware location includes customer pick-up, logistics – shipping & receiving, production, installation, lock shop, and warehousing. This expansion allows Walsh to expand preinstallation of door hardware capacity, provide more innovative and efficient door fabrication capabilities, and offer additional affordable warehousing to provide just-in-time deliveries to our commercial customers.

Job creation is also an important element of Walsh's recent expansion. At this time, ten new positions have been added, and the additional space allows for opportunities to expand the staff in the future as the business continues to grow.

“Our goal is to continually improve the quality of the products and services we provide our commercial customers in the Midwest, and across the Nation,” said Marty Walsh IV, president of Walsh Door & Security. “We believe expanding to add additional production, warehouse, and logistics capabilities will allow us to better serve our existing customers, gain additional customers and further grow our commercial door, hardware, and electronic security business.”

“The Walsh Team will continue to specialize and expand our project work in Data Centers, Health Care, Military, K-12 Education, Colleges and Universities, and School Safety,” said Brady Warrick, VP of Finance & Operations at Walsh. “Our commercial customers count on us to provide innovative, accurate and timely solutions for their door and electronic security needs. We are adding CNC machines to streamline door fabrication and expanding our preinstalled door hardware capabilities to assist with the installation process, which will allow us to meet and exceed their needs”.

Walsh Door & Security believes this extensive expansion in Des Moines will help the team provide better service for commercial customers throughout the Midwest and across the United States.

### **About Walsh Door & Security**

Walsh is one of the Nation’s leading providers of premium commercial door, frame, hardware and electronic security products and services, specializing in Data Centers, Health Care, Military, K-12 Education, Colleges and Universities, and School Safety. Partnering with national and regional General Contractors and Commercial Customers for their new construction or existing facility needs, we focus on providing accurate and professional service. With offices in Des Moines, Iowa City and Kansas City, the company is family-owned and -operated, more than 158 years old and focused on meeting or exceeding the needs of commercial customers.
